

## Learn more: Commercial Drainage

Apex Utility Services supports businesses across Kent with practical, reliable commercial drainage services. Whether you manage an office, retail unit, industrial site, or a multi-tenant property, we help keep your drainage system working properly, reduce disruption, and address issues quickly when they arise.

### What can we help with?

Drain unblocking – clearing stubborn blockages in internal and external drains.

High-pressure water jetting – removing built-up grease, silt and debris to restore flow.

CCTV drain surveys – inspecting pipework to identify the cause of recurring problems and highlight defects.

Drain repairs – addressing damaged sections of pipework and resolving ongoing drainage faults.

Routine maintenance – planned visits to help prevent repeat blockages and unexpected downtime.

New drainage installations – drainage for new-build commercial projects and site works, planned and installed with care.

A straightforward, professional service

We take a safety-first approach and aim to keep disruption to a minimum. You'll get clear communication throughout, and simple, practical advice on the best next steps—whether that's a quick clearance, further investigation, or a longer-term fix.

### Why choose Apex Utility Services

- **Local to Kent** – responsive support from a team that knows the area.
- **Professional and approachable** – clear communication, tidy working, and respect for your site.
- **End-to-end service** – from investigation and maintenance through to repairs and new installations.
- **Safety-first, minimal disruption** – we plan the work carefully to keep your business running.
- **Clear findings and advice** – straightforward reporting and practical recommendations, with no jargon.
